```
                              *****

Enter command:
look at location
You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
Enter command:
move upstair
You followed to the upstair going through Stair and reaching the upstair attic

You are in upstair attic
In the current location, you see: you have caught glimpse of that silhouette again, but this time it is dangling from the ceilling

Within closer inspection, you see:
        A very down-graded rope (rope)
You can see the exit at west.
Enter command:
head west
You followed to the west going through Door and reaching the red bed

You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
Enter command:
move down stair
You followed to the upstair going through Stair and reaching the upstair attic

You are in upstair attic
In the current location, you see: you have caught glimpse of that silhouette again, but this time it is dangling from the ceilling

Within closer inspection, you see:
        A very down-graded rope (rope)
You can see the exit at west.
Enter command:
go west
You followed to the west going through Door and reaching the red bed

You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
Enter command:
```

Breakdown:

look at location to see the pathing and move accordingly

```
Enter command:
look at location
You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
```

Move upstair:

```
Enter command:
move upstair
You followed to the upstair going through Stair and reaching the upstair attic

You are in upstair attic
In the current location, you see: you have caught glimpse of that silhouette again, but this time it is dangling from the ceilling

Within closer inspection, you see:
        A very down-graded rope (rope)
You can see the exit at west.
```

Exiting upstair and returning to initial location at west:

```
Enter command:
head west
You followed to the west going through Door and reaching the red bed

You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
```

The same logic applies to the second location, basement:

```
Enter command:
move down stair
You followed to the upstair going through Stair and reaching the upstair attic

You are in upstair attic
In the current location, you see: you have caught glimpse of that silhouette again, but this time it is dangling from the ceilling

Within closer inspection, you see:
        A very down-graded rope (rope)
You can see the exit at west.
```

Returning to initial position:

```
Enter command:
go west
You followed to the west going through Door and reaching the red bed

You are in red bed
In the current location, you see: You have just woken up from a strange red bed, it felt really sticky and hard to get out of bed

Within closer inspection, you see:
        Computer (pc)
        A rather dull pocket knife (pocket_knife)
You can see exits downstair, and upstair.
Enter command:
```
